Anti-inflammatory

Used to reduce ocular inflammation caused by surgery, injury, infection, or allergy.

1. Corticosteroid Eye Drops ✅

- Inhibit multiple inflammatory pathways (cytokines, prostaglandins) has Strong anti-inflammatory effect.
- Used for Post-operative inflammation, Severe allergic conjunctivitis & Uveitis.

2. NSAID Eye Drops ✅

- Inhibit COX enzymes → ↓ prostaglandin production → Mild to moderate anti-inflammatory effect.
- Used for Post-cataract surgery, Seasonal allergic conjunctivitis & Pain after refractive surgery

5 **Anti-inflamatory**

- **Steroids**
  - Prednisolone
    - ▪ PREDFORTE®
    - ▪ OPTIPRED®
    - ▪ APICORT®
  - Fluorometholone
    - ▪ OPTILONE®
    - ▪ FML®
  - Fluorometholone + Sodium Cromoglycate
    - ▪ FLUCA®
- **NSAIDS**
  - Diclofenac
    - ▪ OCUGESIC®
  - Nepafenac
    - ▪ NEVANAC®
  - Bromfenac
    - ▪ BROFIX®
  - Ketorolac
    - ▪ ACUVAIL®
    - ▪ ACULAR LS®

Antibacterials

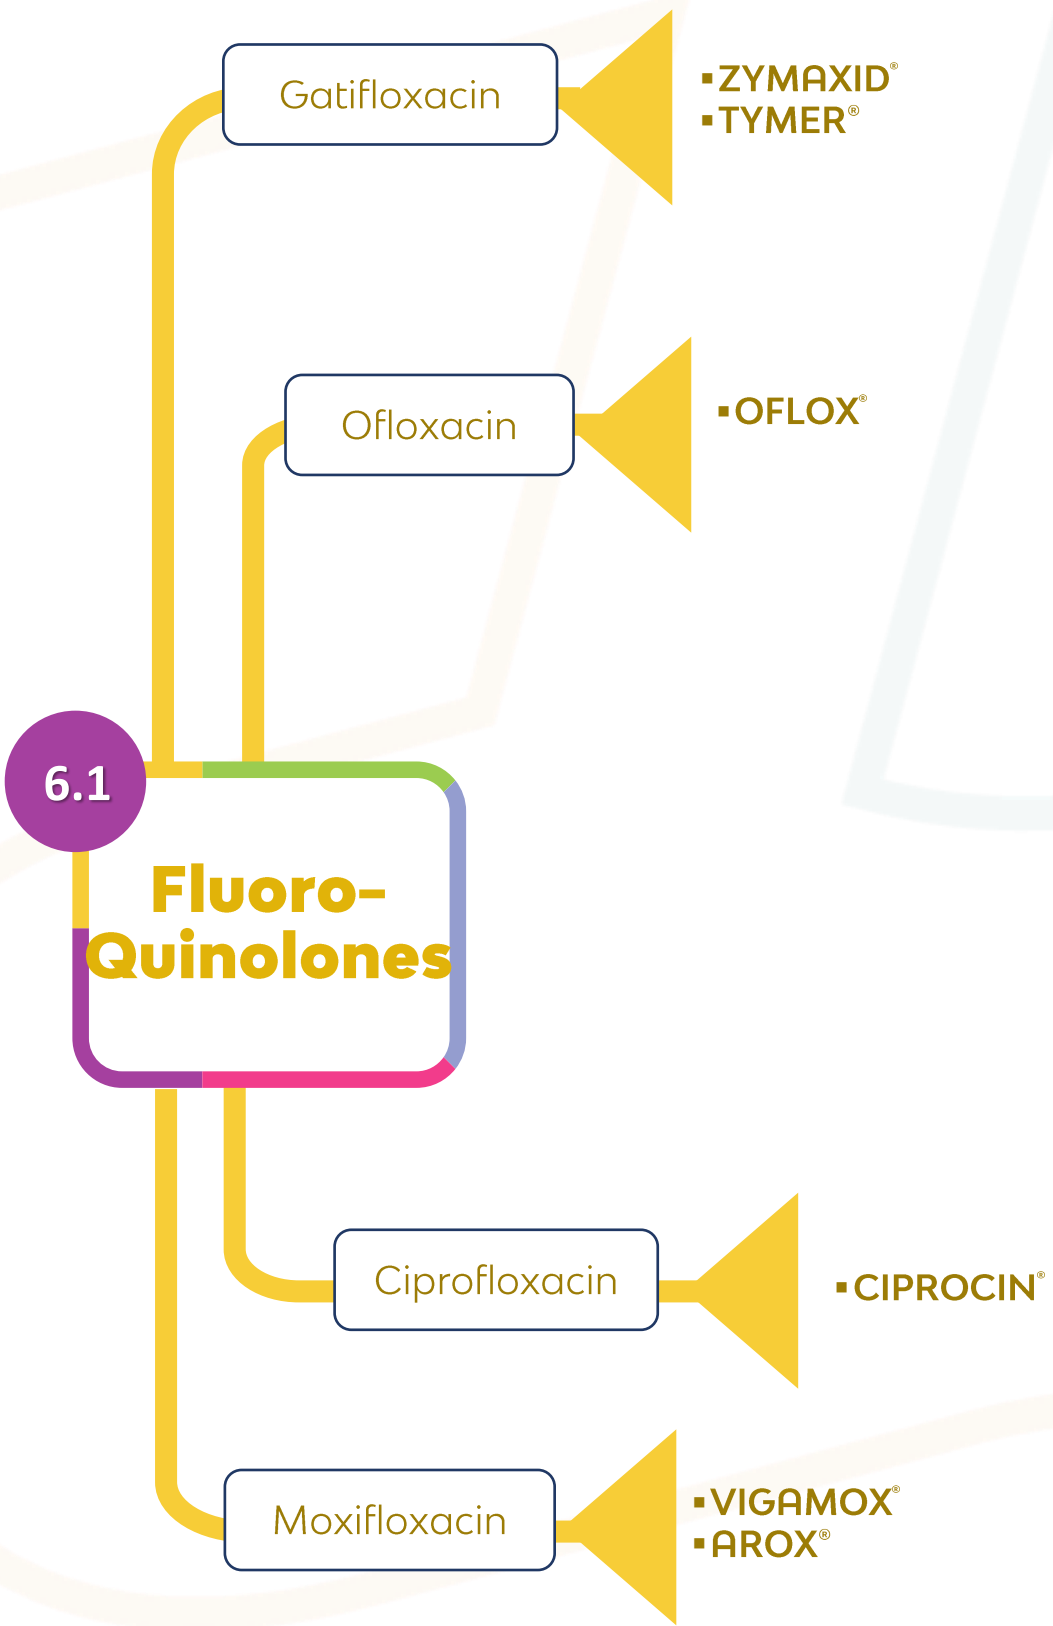

Used to treat bacterial eye infections such as conjunctivitis, keratitis, or blepharitis.
They work by killing or inhibiting bacteria directly on the eye surface.

1. Fluoroquinolones ✅
- Inhibit bacterial by block DNA replication.

2. Aminoglycosides ✅
- Inhibit bacterial protein synthesis.

3. Fusidic Acid ✅
- Inhibits bacterial protein synthesis.

4. Chloramphenicol ✅
- Inhibits bacterial protein synthesis.
- May be used in children & babies.

Gatifloxacin
ZYMAXID®
TYMER®
Ofloxacin
OFLOX®
6.1
Fluoro-Quinolones
Ciprofloxacin
CIPROCIN®
Moxifloxacin
VIGAMOX®
AROX®

6.2 Amino-glycosides

- Tobramycin
  - TOBREX®
  - TOBRACIN®
  - TOBRADEX®
  - OPTIDEX T®
- Neomycin + Polymyxin
  - MAXITROL®
  - NEODEX®

6.3 Fusidic acid

- FUCITHALMIC®
- OPTIFUCIN®

6.4 Chloram-phenicol

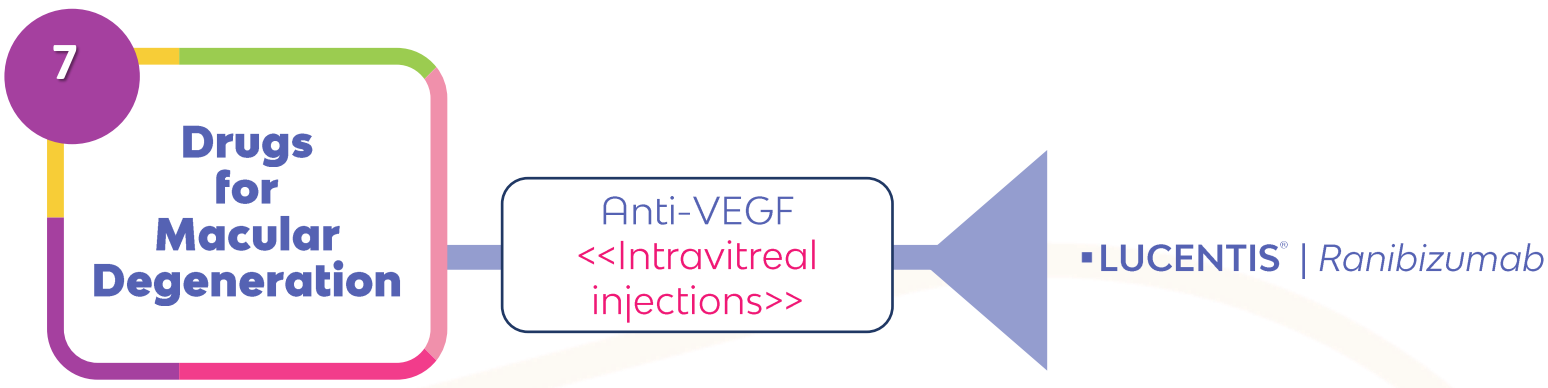

- RIACHOL®
- PHENICOL®

Drugs for Macular Degeneration

Age-related macular degeneration (AMD) is a leading cause of vision loss in older adults, especially the wet (neovascular) type that involves Abnormal blood vessel growth under the retina
Leakage of fluid and blood → macular swelling → vision distortion and loss.

Treatment Goal ✅

- Inhibit VEGF (vascular endothelial growth factor) to prevent abnormal vessel growth and leakage.

Ear Drops

Ear drops are used to treat ear infections, pain, and to maintain ear hygiene.

1. Anti-Infective Drops ✅
- Used to treat ear infections (e.g. otitis externa).

2. Antibacterial & Anti-inflammatory Drops ✅
- Contain an antibiotic plus a steroid to reduce infection and inflammation.

3. Analgesic Ear Drops ✅
- Provide pain relief in mild to moderate ear discomfort.
- Used for Temporary relief of pain from otitis or after minor procedures.

4. Ear Wax Removal & Hygiene Drops ✅
- Help soften and remove earwax (cerumenolytics) and maintain ear cleanliness.
- For patients with wax buildup, and before ear irrigation.

8 Ear related products

Anti-Infective

- **CIPROCIN** ® | *ciprofloxacin*
- **OTOCOL** ® | *chloramphenicol*
- **OTOZOL** ® | *clotrimazole*

Antibacterial + Anti-inflammatory

- **NEODEX** ® | *dexamethasone & neomycin*

Analgesics

- **EARCALM** ® | *benzocaine, & phenazone*

Ear hygiene

- **DEWAX** ® | *docusate sodium*
- **VIVO** ® | *docusate sodium*
- **OTOSAN** ®
- **OTIBLOCK** ® | *hydrogen peroxide*
