05 Anti-Diarrheal

06 Laxatives

07 Anti-Spasmodic

Anti-Diarrheal

Diarrhea is the frequent passage of loose stools. Treatment aims to relieve symptoms, treat the cause, and prevent dehydration.

1. Opioid Agonists ✅
- TheySlows gut motility by acting on opioid receptors, usually used for Symptomatic relief of non-infectious diarrhea.

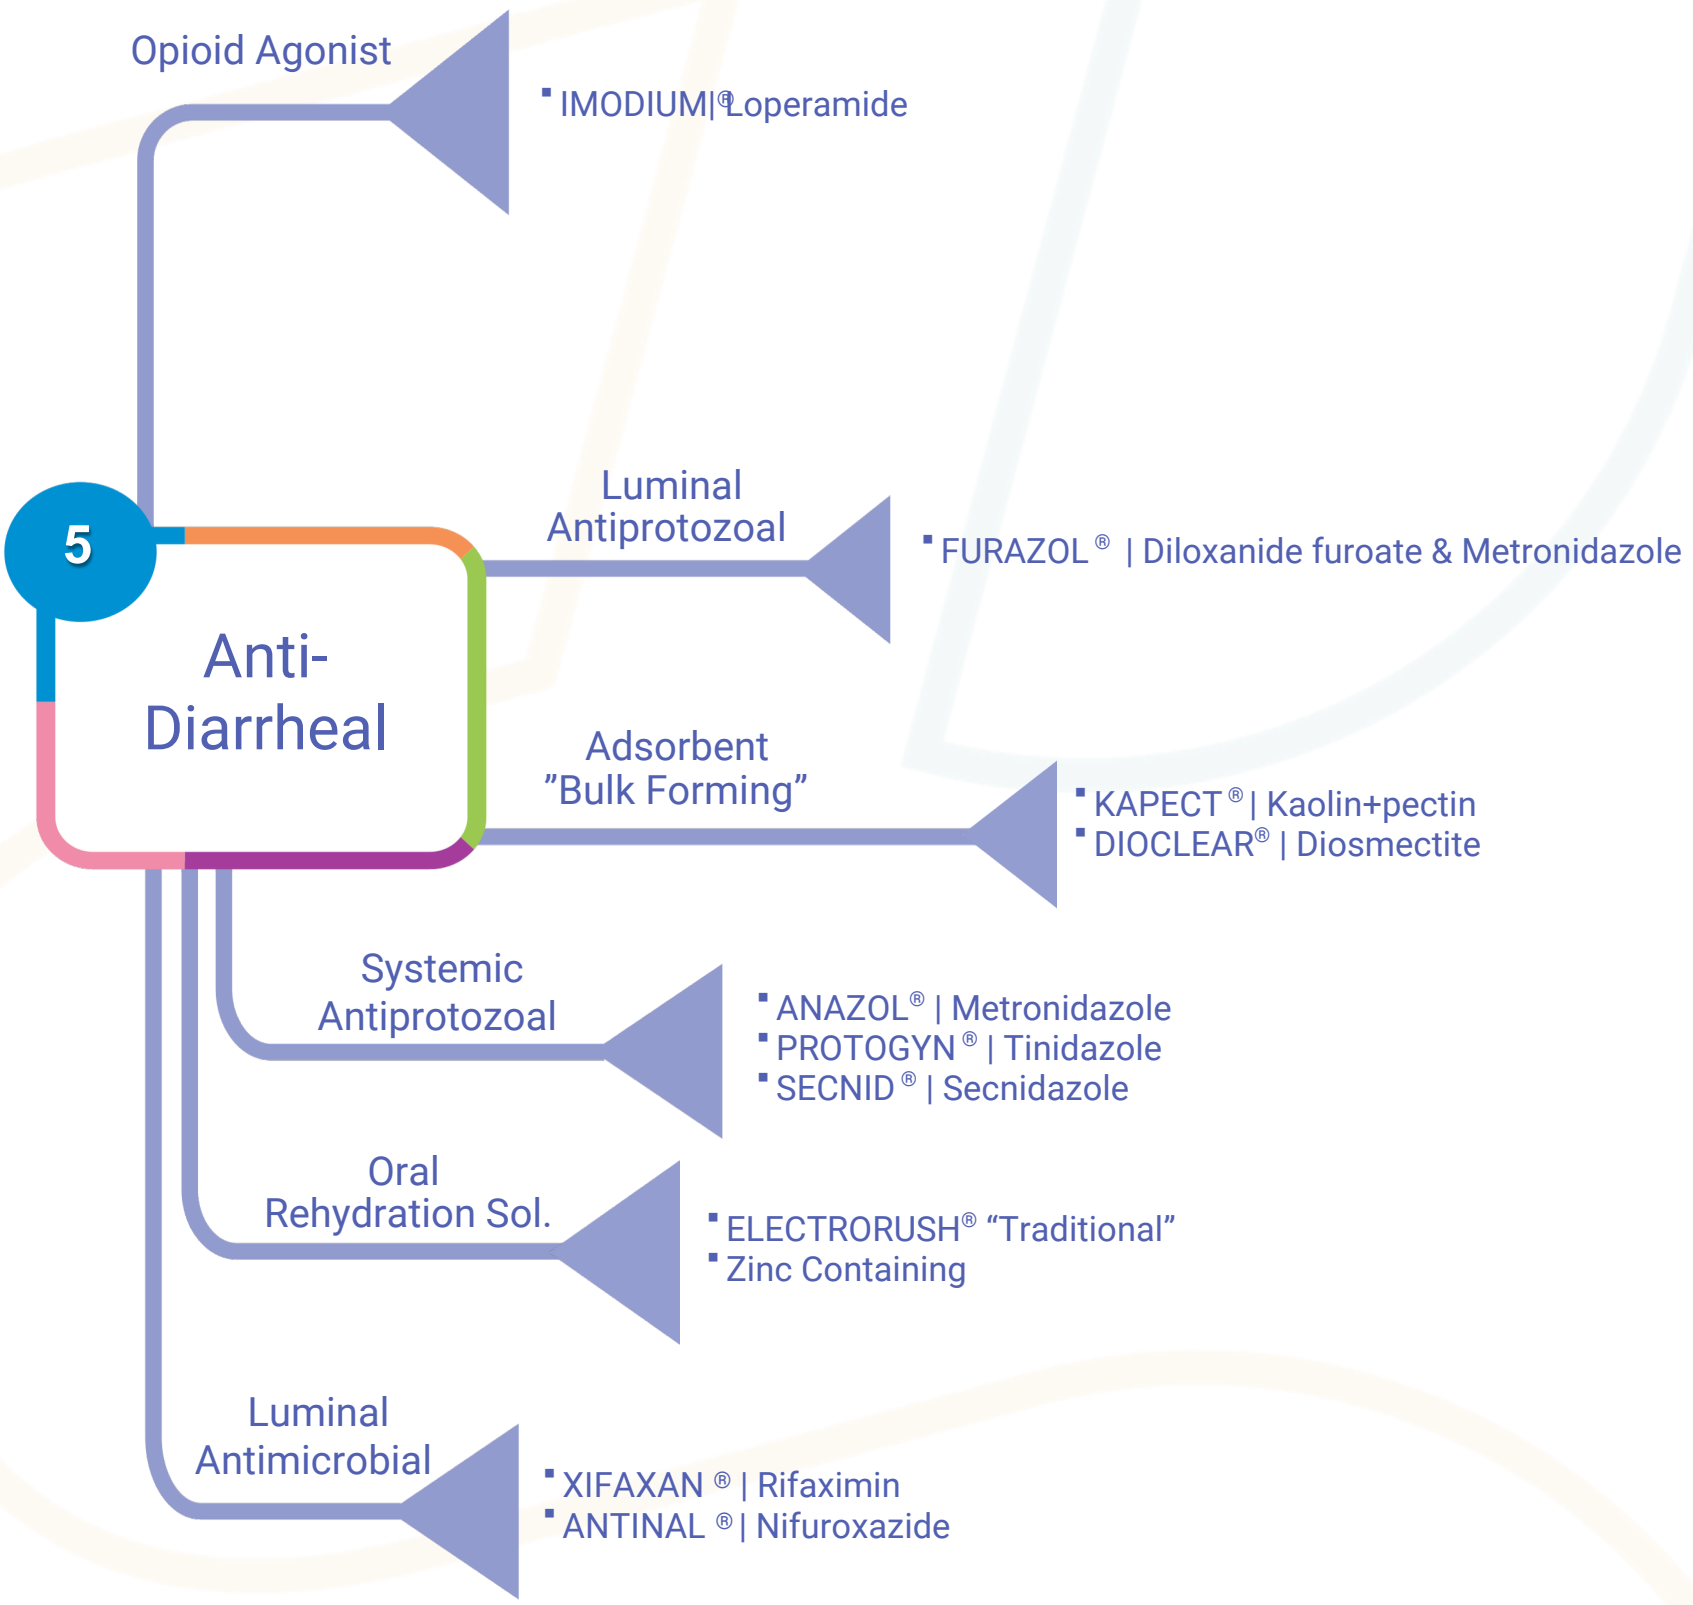

3. Adsorbents / Bulk-forming agents ✅
- They Bindtoxins andwater,bulkingup stools but May interfere with absorption of other drugs.

4. Oral Rehydration Solutions (ORS) ✅
- They are the First-line inall types ofdiarrhea, especially in children and elderly aims to They Restore fluids and electrolytes balance.

5. Luminal Antimicrobials ✅
- They Acts within theguttokill bacteria.

6. Luminal Antiprotozoals ✅
- They Kill protozoa intheintestinal lumen.

7. Systemic Antiprotozoals ✅
- They Kill protozoa throughout the body usually used in sever cases.

5
Anti-
Diarrheal
Opioid Agonist
IMODIUM|® Loperamide
Luminal
Antiprotozoal
FURAZOL® | Diloxanide furoate & Metronidazole
Adsorbent
"Bulk Forming"
KAPECT® | Kaolin+pectin
DIOCLEAR® | Diosmectite
Systemic
Antiprotozoal
ANAZOL® | Metronidazole
PROTOGYN® | Tinidazole
SECNID® | Secnidazole
Oral
Rehydration Sol.
ELECTRORUSH® "Traditional"
Zinc Containing
Luminal
Antimicrobial
XIFAXAN® | Rifaximin
ANTINAL® | Nifuroxazide

Laxatives

Laxatives are used to treat constipation by promoting bowel movements. The choice depends on the cause, duration, and patient condition.

1. Bulk-Forming Laxatives ✅
- They Increasegastric motility.

2. Osmotic Laxatives ✅
- They Drawwaterinto thebowel,softeningstool and increasing motility.

3. Stimulant Laxatives ✅
- They Stimulate intestinal nerves to promote peristalsis.

4. Stool Softeners ✅
- They Reduce surface tension of stool, allowing water to mix in.

5. Chloride Secretion Activators ✅
- They Increases fluid in intestines to ease stool passage.

6. Prokinetic Laxatives ✅
- TheyStimulatesserotonin (5-HT4) receptors to enhance gut motility.

6 Laxatives

- **Bulk forming**
  - BIOFIBER®
  - SUPERFIBER®
  - HYFIBER®
- **Osmotic laxative**
  - DUPHALAC® | Lactulose
  - MOVIPREP® & MOVICOLE® | PEG
  - LAXOLYNE ADULT SUPP® | Glycerin
- **Stimulant laxative**
  - A-LAX® | Senna
  - DULCOLAX® | Bisacodyl
  - PICO® | Sodium picosulphate
- **Stool softener**
  - LAXATROL® | Sodium Docusate
  - PARAFIN OIL
- **Chloride secretion activator**
  - AMITIZA® | Amipristone
- **Prokinetic Laxative**
  - RESOLOR® | Prucalopride

Anti-Spasmodic

Antispasmodics are drugs that relieve smooth muscle spasms, especially in the gastrointestinal. They help reduce cramping, pain, and discomfort in conditions like IBS (Irritable Bowel Syndrome) and spastic colitis.

1. Anticholinergic Agents ✅

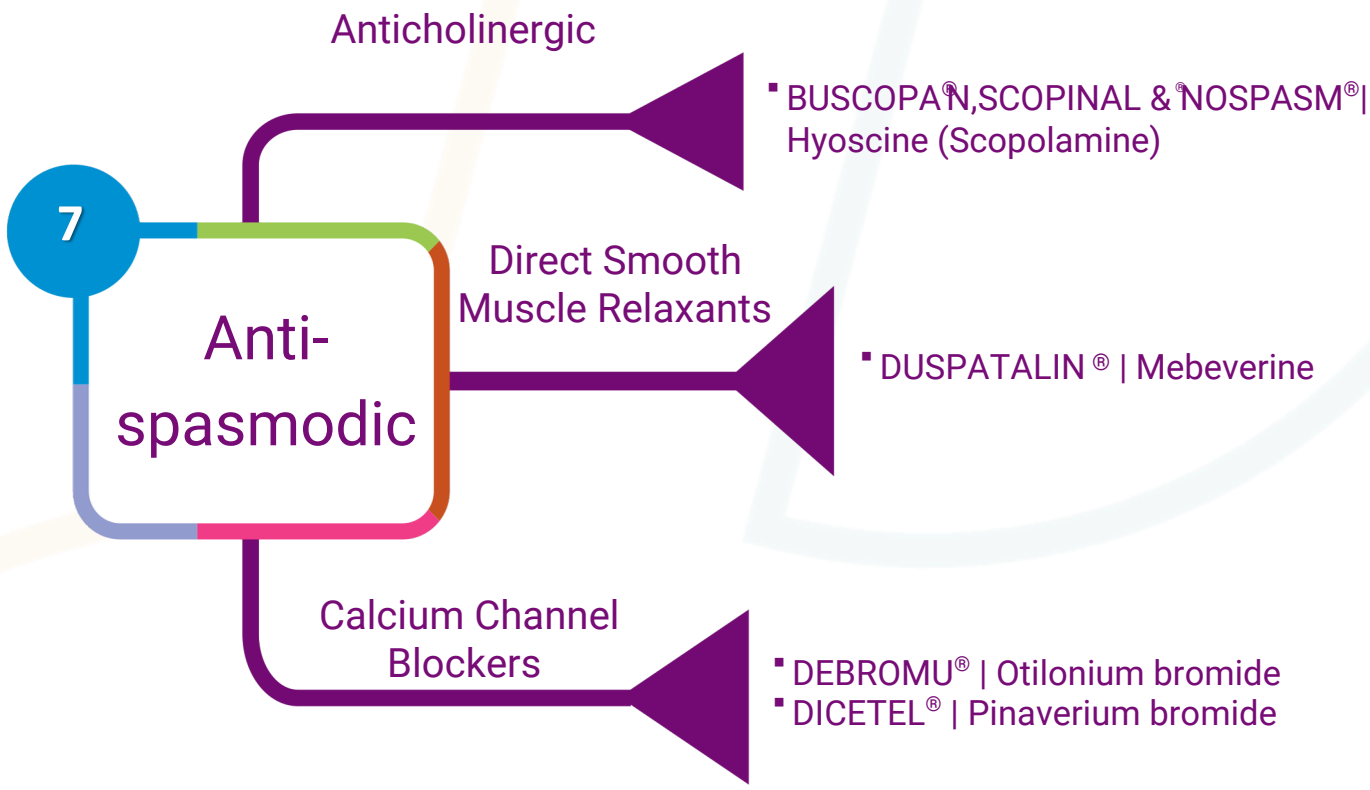

- They Block muscarinic receptors→ reduce smooth muscle contractions.

2. Direct Smooth Muscle Relaxants ✅

- TheyAct directlyontheintestinalmuscle → reduce spasm without anticholinergic side effects.

3. Calcium Channel Blockers ✅

- TheyInhibitcalciuminfluxinGI smooth muscles → reduce spasm.

7
Anti-spasmodic
Anticholinergic
BUSCOPAN®,SCOPINAL & NOSPASM®| Hyoscine (Scopolamine)
Direct Smooth Muscle Relaxants
DUSPATALIN ® | Mebeverine
Calcium Channel Blockers
DEBROMU® | Otilonium bromide
DICETEL® | Pinaverium bromide
