1 Cleansing

- Shampoo is a cleanser designed to remove sebum, eccrine sweat, apocrine sweat, fungal elements, desquamated corneocytes, styling products, and environmental dirt from the scalp and hair.
- **Shampoo types:**

1. Clarifying shampoo:
Aiming to deep cleansing so it contains sulphates (Sodium lauryl sulphate &....).
Suitable for normal and oily hair.

2. Sulphate-free shampoo:
Aiming to cleansing without dryness so it contains milder detergent (Cocamidopropyl betaines).
Suitable for normal and dry hair.

3. 2 in 1 shampoo:
Aiming to mild cleansing with conditioning effect.
Suitable for curly, kinky and hair treated customer.

4. Anti-hair loss shampoo:
Adjuvant product to be used with hair loss treatment, contains mild detergent.

Cleansing products types

2 Conditioning

• Hair conditioners are designed to reverse this hair damage by decreasing static electricity, improving manageability, increasing hair shine, decreasing split ends, and improving hair flexibility.

- **Conditioners types:**

1. Instant conditioners:

Instant conditioners contains Cationic surfactants: E.g., cetyltrimethylammonium chloride, behentrimonium methosulfate – these bind to negatively charged hair strands and smooth them.
Suitable for all hair types.

2. Deep conditioners:

Hair masks also known as deep conditioners they are rich, concentrated hair care products designed to provide deep nourishment, hydration, and repair.
Suitable for all hair types specially damaged hair.

Conditioning products types
