Nasal Sprays and Drops

Nasal sprays and drops are used to treat nasal congestion, allergies, dryness, and inflammation. They act locally in the nasal passages with fewer systemic effects:

1. Nasal Corticosteroids ✅

- Typically Used forAllergic rhinitis, nasal inflammation to reduce inflammation and swelling, but note that it need regular use for full effect; not for quick relief

2. Sea Water Sprays (Saline Irrigation) ✅

- Mainly it has two types Isotonic or hypertonic.
- Used to Clean the nose, remove allergens, hydrate mucosa for moisturizes and helps clear mucus,
- Note that it is the Safest option for all ages; and can be used daily.

3. Nasal Decongestants ✅

- Used for Short-termrelief of nasal congestion act by Constrict blood vessels → reduce swelling but Use for max 5–7 days to avoid rebound congestion.

4. Nasal Antihistamines ✅

- Used for Allergic rhinitisby Block histamine locally in the nose (Less side effects compared to systemic antihistamines)

4 Nasal Sprays and Drops

- **Sea water**
  - OCEAN®
  - AQUAMER®
  - SINOCLEAR®
- **Decongestant**
  - OTRIVIN® | Xylometazoline
- **Antihistamines**
  - DYMISTA®| Azelastine
  - LIVOSTIN®| Levocabastine
- **Corticosteroids**
  - AVAMYS®| Fluticasone Furoate
  - FLIXONASE®| Fluticasone Propionate
  - NASONEX®| Mometasone
  - RHINOCORT®| Budesonide
  - RINO CLENIL®| Beclomethasone
